## For Global Action To Stop US Nuke Sub Base in Australian Port Kembla And AUKUS US/UK/Australia Military Alliance

The US Biden government with the support of both Democrats and the Republicans is preparing for war against China and has set up Aukus, a trilateral “security” pact between Australia, the United Kingdom, and the United States.

As part of this pact, the US now wants to destroy the Australian MUA organized Port of Kembla and build a nuclear submarine base which would threaten the survival of unionized port as a commercial port. The unions and community have had a development plan for renewable energy projects employing thousands of workers and this Nuke base would destroy this initiative.

On May 6, 2023, there will be a rally at the Port Kembla organized by the trades council with the support of the MUA and community. There will be a workers community march to the NSW city of Port Kembla to oppose its use as a base for a future submarine fleet. “The battle for Port Kembla has begun,” said Arthur Rorris, the secretary of the South Coast Labour Council, a long-standing Labor member and one of the organizers of the annual march.”

Around the world, we must support our brothers, sisters, and siblings at the Port of Kembla. Workers need to organize against the militarization of Asia as well as uniting against this new US nuclear base in Australia and the reactionary AUKUS agreement.

The US and the UK with Japan and Australia is working double time to surround China a provoke another war in Asia. While millions of US people have no healthcare, face homelessness and hunger, the US and its military industrial complex is pushing Australia and the world to prepare for world war.
