

Prepare Now To Fight Fascist Martial Law Time For A General Strike & Labor Party NOW!

Statement of UFCLP

Working class and democratic rights are under direct attack. The destruction of workers and union rights with the termination of Federal worker union contracts and the appointment of union busters who are now in government is a direct threat to union rights and our health and safety on the job.

This fascist government is already setting the stage for martial law and dictatorship while attempting to bring back the Confederacy; that is to completely undermine any gains that Black people have made since the Civil War. They have disenfranchised Black representation in Louisiana, Texas, North Carolina and Alabama and this is just the beginning of Jim Crow 2. They want to bring back the good old days of segregation and slavery, and they plan to enforce it with the \$70 billion the US Congress just voted to give to the ICE fascist thugs, and for more concentration camps throughout the country.

Trump's attack on the election in California, asserting that it was rigged, is setting the stage to cancel the votes of not only California but other states in the upcoming midterms. The silence of the AFL-CIO and other unions is deafening.

We cannot close our eyes and deny reality because of the terror planned by these fascist gangsters. It is time now to prepare for a general strike which is the ONLY force that can challenge and push back this coming fascist coup. We also cannot wait until 2028.

An insurrectionary Congress, Court and Executive will

not allow a transfer of power, and since Trump controls the Federal state apparatus it is likely that he will prevent a transfer of power to the Democrats.

We need to get action resolutions passed in our unions and labor councils to prepare for a fightback which will call for all our national unions to prepare for the coming martial law.

We need to build a national network and working class united fronts of trade unionists, immigrant rights groups and all those who want to build a mass working class movement for action & power.

The need for a mass democratic labor party is vital. The Democrats cannot stop fascism and world war. The expansion of US imperialist wars and genocide in Gaza, Lebanon, Iran and the attacks on Venezuela and the coming attack on Cuba are escalating.

We need a general strike to stop these wars, to bring national single payer healthcare and to stop the terrorist fascist ICE thugs that roam the streets of the US. These are the people who killed Renee Good, Alex Jeffrey Pretti and Keith Porter. Organizing these united fronts will help beat Amazon and bring millions of workers into our unions as did the mass strikes during the 1930's.

The time for action is now. The United Front Committee For A Labor Party UFCLP is working nationally and internationally for mass working class action to stop the genocidal wars abroad and win the war at home.
